

# Local docs pair up with 'Dr. 90210'

Two local plastic surgeons will be participating in a new breast implant study along side Dr. Robert Rey of E!'s "Dr. 90210."

Dr. William Burden and Dr. Scott Ennis of Destin Plastic Surgery are among only 30 plastic surgeons who were chosen from the United States to be included in the study.

Mentor Corporation, a leader in breast implant manufacturing, has created a new adjustable silicone gel implant that is now in clinical trial.

Mentor chose the 30 surgeons based on their experience with silicone implants and credentials. Burden and Ennis are the only plastic surgeons in Northwest Florida invited to participate.
